Contents of *Ecological Modelling*, Vol. 72

VOL. 72 NOS. 1,2 MARCH 1994

Water quality simulation modeling and uncertainty analysis for risk assessment and decision making
K.H. Reckhow (Durham, NC, USA) 1
Numerical simulation model for quantitative management of aquaculture
M.J. Kishi, M. Uchiyama and Y. Iwata (Tokyo, Japan) 21
Ecosystem modeling of a multi-species integrated aquaculture pond in South China
H. Hagiwara and W.J. Mitsch (Columbus, OH, USA) 41
An individual-oriented model of a wading bird nesting colony
W.F. Wolff (Oak Ridge, TN, Knoxville, TN, USA) 75
The effect of aphid (*Dysaphis plantaginea* Pass., Hom., Aphididae) feeding on apple fruit growth
E. De Berardinis (Bologna, Italy), P. Baronio (Viterbo, Italy) and J. Baumgärtner (Zürich, Switzerland) 115
Emergy-based ascendency
V. Christensen (Metro Manila, Philippines) 129

Book Reviews 145
Announcement 152

VOL. 72 NOS. 3,4 APRIL 1994

On the interconnection of ecological system models
S.H. Birkett (Guelph, Canada) 153
Modeling deer herd management: sterilization is a viable option
J.L. Boone and R.G. Wiegert (Athens, GA, USA) 175
Estimating the impact of triploid grass carp on sago pondweed in the Byrnes Canal: Implications for biological control in northern California irrigation systems
D.F. Spencer (Davis, CA, USA) 187
Use of a native predator to control overcrowding in warm-water polyculture ponds: simulation of a tucunare (*Cichla monoculus*)–tilapia (*Oreochromis niloticus*) system
G.W. Fischer and W.E. Grant (College Station, TX, USA) 205
A three variable differential equation model for gypsy moth population dynamics
J.W. Wilder, N. Voorhis, J.J. Colbert and A. Sharov (Morgantown, WV, USA) . . . 229
